

## Opening for Application Developers

Havstruck is looking for ambitious Application Developers who will help create robust and scalable JavaScript applications. Working closely with the founding team and senior engineers, you will embody our collaborative, supportive and innovative culture.

We aspire to be at the forefront of innovation and modernization of the freight forwarding sector. We are building an ecosystem of applications that can be used by various stakeholders in this traditional sector to improve their efficiency. We currently have more than fifty customers who use our products. While most startups in this space are trying to remove these traditional middlemen, we believe that they will remain critical to this sector and hence are helping them adopt technology to run their businesses.

We are currently a team of less than ten, and there is scope for learning and growing with us. We believe that a diversity of perspectives, ideas and cultures leads to the creation of better products and services.

### Responsibilities:

- Develop, test, maintain and improve front-end applications.
- Build products that can scale for users around the world.

### Required skills:

- BE degree in Computer Science, similar technical field of study or equivalent practical experience.
- Software development experience HTML, CSS and JavaScript.
- Experience working with web application development and RESTful APIs.

### Preferred skills:

- Experience with one or more general purpose programming languages including but not limited to: Java, C#, Objective C, Python, Dart, or Go.
- Interest and ability to learn other coding languages as needed.

You will be working out of our office in Malleshwaram, Bangalore. ESOPs is an option for members of the initial team that stay with us as we grow. We are flexible with leaves as long as responsibilities are being fulfilled.

If you feel Havstruck is the right place for you to be, please do send us your CV at [careers@havstruck.com](mailto:careers@havstruck.com) with the subject as "CV - Application Developer".

We request you to include your past projects along with the precise nature of your contribution towards each of the projects in your CV. Look forward to hearing from you.
